A NOTE FROM THE ORGANISER

Twenty-five years of MIFB would not have been possible without the continued support of the industry. To every exhibitor, buyer, partner, and visitor who has chosen to be part of this journey year after year, thank you for your trust. Our commitment for MIFB 2026 is simple: to make this platform even more valuable for your business.

This year, MIFB brings together more than 520 local and international exhibitors across three co-located events: **Malaysian International Food & Beverage Trade Fair (MIFB)**, **Malaysia Café Expo (MCE)**, and **MyFoodTech (MYFT)**. Together they span the full F&B value chain: ingredients and raw materials, finished retail and foodservice products, halal-certified offerings, café equipment and specialty coffee, and food processing technologies.

Beyond the exhibition floor, MIFB offers a comprehensive programme of features and experiences designed to help visitors connect, learn, and do business. Within Malaysia Café Expo, visitors can witness the **Malaysia National Coffee Championship (MNCC)**, organised in partnership with the **Malaysia Specialty Coffee Association (MSCA)**, where the country's leading baristas compete for the national title.

MIFB ChefTable brings live cooking demonstrations and tastings to buyers, so products can be experienced before purchase. **MIFB Launchpad** gives local F&B startups a stage to pitch to industry leaders and investors. **MIFB HalalHub** offers guidance on halal certification, compliance, and traceability, while **MIFB Connect** brings exhibitors and pre-qualified buyers together for exclusive, invitation-only networking.

For visitors seeking practical industry insights, the **MIFB Knowledge Hub** delivers three days of focused content. Day One on how AI and digital tools are transforming Malaysian F&B; Day Two on candid founder, entrepreneur, and investor discussions about building, scaling, and funding brands; Day Three an Export Masterclass for companies going international.

We encourage you to make the most of your time at MIFB 2026. Use this Show Preview to **plan your** visit to the Kuala Lumpur Convention Centre from 15 to 17 July 2026.

We look forward to welcoming you to MIFB 2026.

MIFB TALK

UNCOVER CUTTING-EDGE F&B INNOVATIONS AT MIFB TALK

MIFB Talk is designed to provide valuable insights and foster in-depth discussions on current and trending topics. With a lineup of esteemed industry experts, this is your chance to gain knowledge and inspiration from the best in the business.

Programme

DAY 1, 15 July

2:30PM – 3:30PM

Beyond the Pressure Cooker: Why True 2-in-1 Retort Technology is the Secret to a 2-Year Shelf Life

Many food entrepreneurs and central kitchens believe that launching a shelf-stable, Ready-to-Eat (RTE) product is as simple as using a commercial pressure cooker. However, this misconception leads to ruined batches, burst packaging, and unreliable sterilization. At the same time, jumping straight into massive, commercial-scale retort machinery for initial recipe development is incredibly risky and expensive. Product formulation requires trial and error, and testing on a massive scale wastes immense time and capital. This session debunks the pressure cooker myth and highlights how local food SMEs, central kitchens, and R&D labs can safely bridge this gap. We will explore how advanced, lab-scale 2-in-1 retort technology allows you to perfect your recipes through cost effective, small-batch testing without risking heavy manufacturing losses. Attendees will discover how to achieve absolute microbial safety and guarantee a 1-to-2 year shelf life using real-time F0-value sterilization control, entirely without chemical preservatives. We will also break down how to protect product texture, color, and packaging integrity using integrated counter-pressure and rapid dual-cooling methods. With the compact, standalone ALP RKZ-40II Retort Autoclave showcased right on stage for a first-hand look, this presentation delivers practical, actionable insights on how to de risk your product development and transform local culinary dishes into premium, export ready retail products.

Khairun Rhidhuan Makmur Azhari
Sales Engineer
(Food Industry)
Enviroterm Sdn Bhd

3:30PM – 4:30PM

Ningxia Beyond Borders – Premium Flavours, Wines & Halal Innovations from China

This session will present and discuss the global trend of non-alcoholic wines and its impacts on the world market by addressing content related to consumer behaviours, winemaking innovations, and shift in social norms.

Siew Vin See
Director
Beau Olam Malaysia
Sdn Bhd

DAY 2, 16 July

10:00AM – 12:00PM

Halal Traceability Programme

This programme on Halal Traceability is designed in line with Malaysia Halal Certification requirements, as stated in the manual procedure and Halal management system guidelines. It focuses on strengthening participants' capability in implementing end-to-end Halal traceability, proper documentation, and supply chain control to ensure continuous Halal compliance.

Halal Development Corporation

12:30PM – 1:30PM

Unlocking Tea, Coffee and Protein Beverage Opportunities with Tetra Pak

This session helps brand owners spot opportunities in tea, coffee, and protein beverages and discover how to bring them to market efficiently. Explore consumer trends, product ideas, and live prototypes, including sunflower protein, with Tetra Pak's packaging, processing, and innovation support.

John Jose & Flavia Fernandez
Marketing Director & COE & Product Concepts Development Leader
Tetra Pak

1:30PM – 2:30PM

AZO Solution (Raw Material Handling)

Introduction to AZO solutions for efficient material handling, automation, and hygienic processing systems in the food and beverage industry. The session will cover system benefits, process optimization, and practical applications for manufacturers.

Shamil / Yusry
Sales Engineer
Azo Limited

2:30PM – 3:30PM

Diversity and Richness of Sambal and Coffee Culture in Indonesia

Indonesia from east to west Archipelago takes at least 7 hours to complete covering 2000 over ethnicities, over 700 languages, and more than 1000 different recipes. Let's take you to the richness and diversities of Indonesia's coffee and sambal from East to West Archipelago.

Andre W. Darmono
Managing Director
Honshitsu Kitchen Pte. Ltd.

3:30PM – 4:30PM

Polish Confectionery Industry – Tradition, Innovation and Export Success

Poland has become one of Europe's leading producers of confectionery, biscuits and sweet snacks. Over the last two decades, the country has built a strong reputation as a reliable supplier of cookies, wafers, chocolate products and bakery confectionery to international markets. The success of the Polish confectionery industry is based on a unique combination of tradition, modern manufacturing technologies.

Marcin Adler
Head of Export
Polish Dept. of Promotion
(J. Chylak Baking and Confectionery Factory)

DAY 3 , 17 July
10:30AM - 11:30AM

Food Quality Beyond Compliance: From Worker Hygiene to Digital Sensory Analysis

Food quality today is no longer just about passing audits. Manufacturers must consistently deliver products that are safe, compliant, and meet consumer expectations for quality, consistency, taste, and smell.

This session explores how food companies can strengthen quality assurance across the full production chain – from worker hygiene, PPE practices, and process monitoring to QA/QC testing and digital sensory analysis. Attendees will gain practical insights into reducing contamination risks, improving consistency, supporting compliance, and using data-driven tools to make better quality decisions.

Ideal for QA/QC, Food Safety, Production, R&D, and Technical teams.

Seah Hong Yee
 Technical Director
 Polyscientific
 Enterprise Sdn Bhd

11:30AM - 12:30PM

Strengthening Industrial Environments Through Durable Flooring Solutions

Industrial environments such as factories, warehouses, production areas, chemical plants, automotive facilities, food processing plants, cold storage facilities, data centres, pharmaceutical plants, semiconductor plants, cold rooms, and clean rooms are exposed to demanding daily conditions, including traffic, machinery movement, chemical exposure, thermal shock, impact, and frequent cleaning. Without the right flooring system, these conditions may lead to common flooring issues such as paint peeling, paint bulging, surface damage, poor durability and recurring maintenance problems.

This talk will share how Nippon Paint Flooring Solutions can help industrial facilities achieve better floor performance, improved safety and longer-lasting protection. The session will cover suitable flooring systems for different industrial areas and how the right solution can help reduce maintenance costs, minimize operation downtime and support a safer working environment.processing, and innovation support.

Vincent Pang
 Senior Manager,
 Flooring Solutions
 Nippon Paint
 (Malaysia) Sdn Bhd

2:30PM - 3:30PM

Advancements in Hygiene and Food Safety Automation

From primitive to full scale advancements in industrial hygiene and washing.

Rajive Dav Miranda
 Key Account Manager - Asia
 Elpress. BV (GCC Scientific
 Instrument)

3:30PM - 4:30PM

Introducing EV Sun: The World's First Healthier and Safer Light for Humans

This speech will start things off by introducing EV Sun has created the world's first non-UV LED lights that also kill up to 90% of bacteria and fungi. It also discusses how this novel product is relatively distinctive to other existing lights by integrating hygiene, health and technology using a novel technology called resonance frequency.

Goh Jing Xiang
 Market Development
 Officer
 EV Lighting Sdn Bhd
